JOURNAL OF ELECTRON SPECTROSCOPY and Related Phenomena

Subject index

Adaptive binomial filter
Noise removal from Auger images by using adaptive bimonial filter 399
ADC
Calculating triply ionized states of molecules by Green's functions: carbon monoxide 307
Adsorbate structure determination
Direct methods for adsorbate structure determination using photoelectron diffraction 85
AED
Incident beam effects in AED (Auger electron diffraction): the case of Cu(001) 493
AES
AES and USXES investigations of the phase transformation in the surface layers of V–Si/SiO_2/Si thin films structure stimulated by oxygen annealing 511
Avrami's kinetic approach for describing Volmer Weber growth mode at solid surfaces studied via PES and AES 283
Electrons on CdTe(110) surface 647
Excimer laser cleaning of Si(100) surfaces at 193 and 248 nm studied by LEED, AES and XPS spectroscopies 607
Quantitative analysis of the composition of silicon-germanium alloys by AES 703
Ag
Cr, Sn and Ag/SnO_2 interface formation studied by synchrotron radiation induced UPS 499
Ag(100)
Interdiffusion and segregation in the growth of thin Fe films on Ag(100); an ARUPS-MDS study 471
Surface magnetism of Fe on Ag(100): a He* spin polarized study 677
Ag/GaAs(110)
Electron energy loss study of Ag and AuGaAs(110) interfaces 449
Aggregation state effect
The ab-initio simulation of Auger spectra 47
Al(111)
Properties of the Al–Ag surface alloy across the phase diagram 529
Al–Ag
Properties of the Al–Ag surface alloy across the phase diagram 529
Al2s
Photoelectron escape depth 443
Al_2O_3/NiAl(100)
Electron spectroscopy studies of small deposited metal particles 301
Alkali metal
Investigation of alkali metals and noble gases adsorbed on transition metals using circular dichroism in angular resolved photoemission 289
Alkanethiol
Surface molecular structure of self-assembled alkanethiols by UPS, Synchrotron Radiation and HREELS 523
Alloy
Properties of the Al–Ag surface alloy across the phase diagram 529
The effect of final state screening changes on alloy energy shifts 319
Amorphous metallic alloy
XPS studies of amorphous alloys 719
Angular correlations
Parameterization of angular correlations in double photoionization to the neon $2p^4\ ^1S^e$ ionic state 229
Angular distribution
Angular distribution and spin polarization of Auger electrons following photoionization by polarized X-rays 157
Angular distribution and spin-polarisation of Auger electrons 225
Design of an electrostatic electron spectrometer for simultaneous energy and angular distribution measurements 433
Annealing
Spin polarized photoemission from thin GaAs photocathodes 505
Application
Electron spectroscopy into the twenty-first century 1
Ar
Low-energy Auger spectra of Ar and Kr emitted in cascade decays after inner shell ionization 325

Many-electron correlations in the photoionization of the $np^5(n+1)s\ ^3P_0$ and $^3P_2$ metastable states of the Ar and Kr atoms 389
ARAES
Angle-resolved metastable atom electron spectra of Xe layers formed on graphite 359
Archaelogical object
Surface and interface microchemistry of archaeological objects studied with X-ray photoemission spectroscopy and scanning Auger microscopy 653
ARPES
A dedicated electron spectrometer for photoionization studies of atomic ions with synchtrotron radiation 237
Angle-resolved photoemission of quasi-one-dimensional metals: evidence for Luttinger liquid behavior 121
Theoretical photoemission line shapes and many body correlations 265
ARUPS
Angle-resolved ultraviolet photoelectron spectroscopy of oriented film of model compound of poly(*p*-phenylene): wavenumber *k* conservation and *k* blurring in a system with small number of repeating units 553
Constant-energy surfaces of nickel near the Fermi energy: an angle-resolved ultraviolet photoemission study on Ni(110) 601
Determination of two-dimensional structures of ultrathin films of H_2- and Cu- phthalocyanine on MoS_2 by angle-resolved ultraviolet photoemission and low energy electron diffraction 213
Electronic states on clean Si(110)16 × 2 and Si(110)2 × 3-Sb surfaces by photoemission and optical spectroscopy 481
Structure of ultrathin films of chloroaluminium phthalocyanine on MoS_2 studied by means of Penning ionization electron spectroscopy, angle-resolved UPS and LEED 259
ARUPS–MDS
Interdiffusion and segregation in the growth of thin Fe films on Ag(100); an ARUPS MDS study 471
Atomic cloth
Design and preparation of an organic monoatomic layer 377
Atomic core potential
The dependence of the atomic core potential on valence charge for Cu 333
Atomic sash
Design and preparation of an organic monoatomic layer 377
Au(110)
Inverse photoemission studies of C_{60} on Au(110) 405
Au/GaAs(110)
Electron energy loss study of Ag- and Au-GaAs(110) interfaces 449
Au/Si
Total reflection X-ray photoelectron spectroscopy 313
Auger electron
Angular distribution and spin polarization of Auger electrons following photoionization by polarized X-rays 157
Angular distribution and spin-polarisation of Auger electrons 225
Auger parameter
Auger parameter and Wagner plot in the characterization of chemical states: initial and final state effects 365
The ab-initio simulation of Auger spectra 47
Auger spectroscopy
Evolution of Auger peaks in GaP(110) with hydrogen chemisorption 393
Auger spectrum
3d-resonant photo- and Auger emission of Ce in CeO_2 583
Low-energy Auger spectra of Ar and Kr emitted in cascade decays after inner shell ionization 325
Noise removal from Auger images by using adaptive bimonial filter 399
Spectator vacancy contributions to the $L_{2,3}M_{4,5}M_{4,5}$ Auger spectra of Pd and Rh: satellites as images of the main spectrum 345
Statistical description of shake satellites in Auger spectra. Oxygen and carbon Auger spectra of the CO molecule 329
The ab-initio simulation of Auger spectra 47
The dependence of the atomic core potential on valence charge for Cu 333
Theoretical autoionization spectra of $1s \rightarrow \pi^*$ excited N_2 and N_2O 295
Auger transition
Low-energy Auger spectra of Ar and Kr emitted in cascade decays after inner shell ionization 325
Spectator auger transitions of the 1s hole states in ionic sulfur compounds and molecular chlorine compounds 411
Autoionization
Theoretical autoionization spectra of $1s \rightarrow \pi^*$ excited N_2 and N_2O 295
Back scattered electron energy distribution
Monte Carlo modelling of the backscattered electron spectra of silver at the 200 eV and 2 keV primary electron energies 427
Back scattering
Photoelectron holography: prospects and limitations of direct methods 351

Barrier height inhomogeneity
Effects of barrier height inhomogeneity on semiconductors core level photoemission line shape 477
Bi/InSb(110)
Electronic properties of (1xn)-reconstructed Bi/InSb(110) interfaces 465
Space charge layer at metal/InSb(110) interfaces 459
Binding-energy shift
On the binding-energy shifts in molecular metal cluster compounds 741

C_{60}
Electronic and geometric structure of small mass selected clusters 37
Inverse photoemission studies of C_{60} on Au(110) 405
Resonant interaction of low energy electrons with intramolecular vibrations in solid C_{60} 115
Carbon monoxide
Oxidation of carbon monoxide and ethylene on Pd(001)-C(2 × 2)Mn 201
Carbon nitride
Characterization of carbon nitride films prepared by laser reactive ablation deposition 747
Catalytic properties
The multi-surface structure and catalytic properties of partially reduced WO_3, WO_2 and $WC + O_2$ or $W + O_2$ as characterized by XPS 195
CDAD
Circular dichroism from non-chiral and non-magnetic materials observed with display-type spherical mirror analyzer 55
Enhancement of circular dichroism in photoemission from adsorbates by photoelectron diffraction 97
Investigation of alkali metals and noble gases adsorbed on transition metals using circular dichroism in angular resolved photoemission 289
CdTe(110)
Electrons on CdTe(110) surface 647
Ce3d
3d-resonant photo- and Auger emission of Ce in CeO_2 583
CEELS
Electron correlation in MnO(100): a comparison of SXAPS and CEELS spectra 547
CeO_2
3d-resonant photo- and Auger emission of Ce in CeO_2 583
CePd
Resonant 3d photoemission of La and Ce around the L_3 absorption edge in LaPd and CePd 735
Chemical derivatization labelling
New findings on polypyrrole chemical structure by XPS coupled to chemical derivatization labelling 629
Chloride formation
Chloride formation and photoreduction on the Cu(100) surface. A study by X-ray photoelectron spectroscopy and low energy ion scattering 91
Chlorine compound
Spectator auger transitions of the 1s hole states in ionic sulfur compounds and molecular chlorine compounds 411
Chloroaluminium phthalocyanine
Structure of ultrathin films of chloroaluminium phthalocyanine on MoS_2 studied by means of Penning ionization electron spectroscopy, angle-resolved UPS and LEED 259
CI
Inner-shell d excitation in gas phase heavy-metal halides by synchrotron radiation photoemission and *ab initio* CI calculations 171
Theoretical autoionization spectra of $1s \rightarrow \pi^*$ excited N_2 and N_2O 295
CISS
Studies of reactive intermediates with photoelectron spectroscopy using synchrotron radiation: initial results on $SO(X^3\Sigma^-)$ 165
Cluster
On the binding-energy shifts in molecular metal cluster compounds 741
Photoemission from large-nuclearity copper-selenide clusters 207
CMA
A dedicated electron spectrometer for photoionization studies of atomic ions with synchtrotron radiation 237
Calculating triply ionized states of molecules by Green's functions: carbon monoxide 307
CO
CO adsorption on Pd: An XPS and density functional approach 383
Growth mechanism and epitaxy of ultra-thin cobalt films on Pd(001) 455
Statistical description of shake satellites in Auger spectra. Oxygen and carbon Auger spectra of the CO molecule 329
Time resolved core level photoemission experiments with synchrotron radiation 145
Coincidence techniques
Investigation of double photoionisation dynamics in molecules using coincidence techniques 63
Complex excitation
Electronically induced dynamics in surface layers 73
Constant-energy surface
Constant-energy surfaces of nickel near the Fermi energy: an angle-resolved ultraviolet photoemission study on Ni(110) 601

Contrast creation in DAES
On the mechanism of contrast creation in Directional Auger Electron Spectroscopy (DAES) 635
Copper phthalocyanine
Determination of two-dimensional structures of ultra-thin films of H_2- and Cu- phthalocyanine on MoS_2 by angle-resolved ultraviolet photoemission and low energy electron diffraction 213
Core electron spectroscopy
Structures at liquid surfaces studied by core electron spectroscopy 417
Correlation satellite
Manifestation of FISCI effects in the total and differential cross sections of the correlation satellites in the rare gases Kr and Xe 337
Coster–Kronig transition
Low-energy Auger spectra of Ar and Kr emitted in cascade decays after inner shell ionization 325
Spectator vacancy contributions to the $L_{2,3}M_{4,5}M_{4,5}$ auger spectra of Pd and Rh: satellites as images of the main spectrum 345
Cr
Cr, Sn and Ag/SnO_2 interface formation studied by synchrotron radiation induced UPS 499
Crystal-field splitting
Appearance of crystal-field splitting in 2p-resonant electron spectra of K^+ in ionic solids 589
Cs/InSb(110)
Space charge layer at metal/InSb(110) interfaces 459
CsI
Structures at liquid surfaces studied by core electron spectroscopy 417
Cu
The dependence of the atomic core potential on valence charge for Cu 333
Cu(001)
Incident beam effects in AED (Auger electron diffraction): the case of Cu(001) 493
Metal phthalocyanines (MPc, M = Ni, Cu) on Cu(001) and Si(001) surfaces studied by XPS, XAS and STM 219
Chloride formation and photoreduction on the Cu(100) surface. A study by X-ray photoelectron spectroscopy and low energy ion scattering 91

Debye temperature
Thermal effects on photoemission spectra of lanthanide metals 571
Density function
CO adsorption on Pd: An XPS and density functional approach 383
Display-type spherical mirror analyser
Circular dichroism from non-chiral and non-magnetic materials observed with display-type spherical mirror analyzer 55
Double photoionization
Investigation of double photoionisation dynamics in molecules using coincidence techniques 63
Parameterization of angular correlations in double photoionization to the neon $2p^4\ ^1S^e$ ionic state 229
Doubly charged ion
Observation of doubly charged atomic and molecular states by threshold photoelectron coincidence spectroscopy 253

e,2e
Reflection (e,2e) experiments: a novel surface spectroscopy 109
The nature of the background in transmission (e,2e) experiments 103
EDC
Theoretical study of optical and ultraviolet photoemission spectra of TiO_2 and VO_2 in rutile phase 753
EELFS
Structural surface investigation with low energy backscattered electrons 29
EELS
Electron energy loss study of Ag- and Au-GaAs(110) interfaces 449
Electron spectroscopy on $KMnO_4$ 671
Plasmon mode splitting in W/Si multilayers, detected by EELS 683
ELAPW
Theoretical study of optical and ultraviolet photoemission spectra of TiO_2 and VO_2 in rutile phase 753
Elastic scattering
Photoelectron escape depth 443
Elastic scattering in overlayers
The influence of elastic scattering in overlayers on PED from PbS single crystals 709
Electron impact ionization
Electron impact excitation and ionization of laser-excited Na atoms 245
Electron spectroscopy
Electron spectroscopy into the twenty-first century 1
Electron–ion coincidence spectroscopy
Combined electron and ion spectroscopy with synchrotron radiation of free metal atoms and ions 21
Electronically induced desorption
Electronically induced dynamics in surface layers 73
Electrostatic electron spectrometer
Design of an electrostatic electron spectrometer for simultaneous energy and angular distribution measurements 433

Energy distribution
A new spectroscopic method for determination of energy distribution of interface states in the semiconductor band-gap 595
Design of an electrostatic electron spectrometer for simultaneous energy and angular distribution measurements 433
Energy-dependent cross section
Resonant interaction of low energy electrons with intramolecular vibrations in solid C_{60} 115
Escape depth
Photoelectron escape depth 443
Energy shift
The effect of final state screening changes on alloy energy shifts 319
ESR
Surface structure of finely dispersed iron stabilized by spontaneous adsorption as derived from XPS and ESR evidence 695
Ethylene
Adsorption of ethylene on Si(111)7 × 7 by synchrotron radiation photoemission 271
Oxidation of carbon monoxide and ethylene on Pd(001)-C(2 × 2)Mn 201
Eu/Gd(0001)
Interfacial magnetism studied by MCD in 4f photoemission: Eu/Gd(0001) 183
Excimer laser cleaning
Excimer laser cleaning of Si(100) surfaces at 193 and 248 nm studied by LEED, AES and XPS spectroscopies 607
Excitation energy
The energy influence of the electron excitation on the shape of X-ray electron spectra of 3d-metals valence bands 619
EXFAS
Structural surface investigation with low energy backscattered electrons 29

FDI
Surface structure of finely dispersed activated iron with immbolized interferon as derived from XPS 689
Fe
Interdiffusion and segregation in the growth of thin Fe films on Ag(100); an ARUPS-MDS study 471
Surface magnetism of Fe on Ag(100): a He* spin polarized study 677
Surface structure of finely dispersed iron stabilized by spontaneous adsorption as derived from XPS and ESR evidence 695
Fe(100)
Spin resolved inverse photoemission of ferromagnets: Fe(100) 177
$Fe(CO)_5$
Synchrotron radiation-induced Fe deposition on Si from organometallic precursors: comparison with Fe silicides obtained by solid-phase epitaxy 437
Fe/Ni
Properties of the Ni/Fe interface in Ni/Fe/Ni multilayers 665
Fermi energy
Constant-energy surfaces of nickel near the Fermi energy: an angle-resolved ultraviolet photoemission study on Ni(110) 601
Fermi surface mapping
Structure and Fermi surface mapping of a modulation-free Pb–Bi–Sr–Ca–Cu–O high-temperature superconductor 127
FISCI
Manifestation of FISCI effects in the total and differential cross sections of the correlation satellites in the rare gases Kr and Xe 337
Foreign imaging
The ab-initio simulation of Auger spectra 47
Fourier transform
Photoelectron holography: prospects and limitations of direct methods 351
Free metal atom
Combined electron and ion spectroscopy with synchrotron radiation of free metal atoms and ions 21
Free positive ion
Combined electron and ion spectroscopy with synchrotron radiation of free metal atoms and ions 21
Fullerene
Electronic and geometric structure of small mass selected clusters 37
Inverse photoemission studies of C_{60} on Au(110) 405
Resonant interaction of low energy electrons with intramolecular vibrations in solid C_{60} 115

GaAs photocathode
Spin polarized photoemission from thin GaAs photocathodes 505
GaAs
A new spectroscopic method for determination of energy distribution of interface states in the semiconductor band-gap 595
GaAs(110)
Effects of barrier height inhomogeneity on semiconductors core level photoemission line shape 477
GaP(110)
Evolution of Auger peaks in GaP(110) with hydrogen chemisorption 393
Graphite
Reflection (e,2e) experiments: a novel surface spectroscopy 109

The nature of the background in transmission (e,2e) experiments 103
Grazing angle technique
Reflection (e,2e) experiments: a novel surface spectroscopy 109
Green's function
Calculating triply ionized states of molecules by Green's functions: carbon monoxide 307
GW approximation
Theoretical photoemission line shapes and many body correlations 265

He*
Surface magnetism of Fe on Ag(100): a He* spin polarized study 677
Heavy metal halide
Inner-shell d excitation in gas phase heavy-metal halides by synchrotron radiation photoemission and ab initio CI calculations 171
High-temperature superconductor
Structure and Fermi surface mapping of a modulation-free Pb–Bi–Sr–Ca–Cu–O high-temperature superconductor 127
Holography
Photoelectron holography: prospects and limitations of direct methods 351
HOMO
Angle-resolved ultraviolet photoelectron spectroscopy of oriented film of model compound of poly(*p*-phenylene): wavenumber (*k*)-conservation and *k*-blurring in a system with small number of repeating units 553
HREELS
Resonant interaction of low energy electrons with intramolecular vibrations in solid C_{60} 115
Space charge layer at metal/InSb(110) interfaces 459
Surface molecular structure of self-assembled alkanethiols by UPS, Synchrotron Radiation and HREELS 523
HTS
Structure and Fermi surface mapping of a modulation-free Pb–Bi–Sr–Ca–Cu–O high-temperature superconductor 127
Hydrogen chemisorption
Evolution of Auger peaks in GaP(110) with hydrogen chemisorption 393

III–V
Surface core level shifts in III–V semiconductors: a high resolution photoemission study 139
Inelastic mean free path formula
Quantitative analysis of the composition of silicon-germanium alloys by AES 703
InP
A new spectroscopic method for determination of energy distribution of interface states in the semiconductor band-gap 595
Interchannel coupling effect
Interchannel coupling effects in the resonant scattering of low-energy electrons from molecular targets 151
Interdiffusion
Interdiffusion and segregation in the growth of thin Fe films on Ag(100); an ARUPS-MDS study 471
Interfacial magnetism
Interfacial magnetism studied by MCD in 4f photoemission: Eu/Gd(0001) 183
Intermetallic compound
Sensitivity of the valence states upon rare earth substitution in intermetallic compounds 517
Ion-charge resolved electron spectroscopy
Combined electron and ion spectroscopy with synchrotron radiation of free metal atoms and ions 21
IPES
Inverse photoemission and photoemission spectra of the PbS(001) surface 729
Inverse photoemission studies of C_{60} on Au(110) 405

K^+
Appearance of crystal-field splitting in 2p-resonant electron spectra of K^+ in ionic solids 589
$KMnO_4$
Electron spectroscopy on $KMnO_4$ 671
Kr
Low-energy Auger spectra of Ar and Kr emitted in cascade decays after inner shell ionization 325
Manifestation of FISCI effects in the total and differential cross sections of the correlation satellites in the rare gases Kr and Xe 337
Many-electron correlations in the photoionization of the $np^5(n+1)s\ ^3P_0$ and $^3P_2$ metastable states of the Ar and Kr atoms 389
Resonance structure of the photoionization cross sections of the Kr atom in the energy region between single and double ionization thresholds 421

Lanthanon
Thermal effects on photoemission spectra of lanthanide metals 571
LaPd
Resonant 3d photoemission of La and Ce around the L_3 absorption edge in LaPd and CePd 735

Laser ionization
Electron impact excitation and ionization of laser-excited Na atoms 245
Laser reactive ablation
Characterization of carbon nitride films prepared by laser reactive ablation deposition 747
LCAO
Structure factor in photoemission from valence band 487
LEED
Excimer laser cleaning of Si(100) surfaces at 193 and 248 nm studied by LEED, AES and XPS spectroscopies 607
LEIS
Chloride formation and photoreduction on the Cu(100) surface. A study by X-ray photoelectron spectroscopy and low energy ion scattering 91
Growth mechanism and epitaxy of ultra-thin cobalt films on Pd(001) 455
LMDAD
LMDAD as a surface magnetometry 189
Luttinger liquid
Angle-resolved photoemission of quasi-one-dimensional metals: evidence for Luttinger liquid behavior 121

Magnetostrictive alloy
X-ray emission and photoelectron spectroscopy study and the electronic structure of $Dy_{1-x}Tb_xFe_2$ ($x = 0.0$, 0.5, 1.0). 641
Many body effect
Theoretical photoemission line shapes and many body correlations 265
Many-electron correlations
Many-electron correlations in the photoionization of the $np^5(n + 1)s\ ^3P_0$ and $^3P_2$ metastable states of the Ar and Kr atoms 389
Mass selected cluster
Electronic and geometric structure of small mass selected clusters 37
MCD
Interfacial magnetism studied by MCD in 4f photoemission: Eu/Gd(0001) 183
MDS
A MDS study of the Yb/GaAs(110) interface 133
Metal phthalocyanine
Metal phthalocyanines (MPc, M = Ni, Cu) on Cu(001) and Si(001) surfaces studied by XPS, XAS and STM 219
Metal-free phthalocyanine
Determination of two-dimensional structures of ultra-thin films of H_2- and Cu-phthalocyanine on MoS_2 by angle-resolved ultraviolet photoemission and low energy electron diffraction 213
Microanalysis
Elemental and chemical microanalysis of silicon surfaces by reflected electron energy loss microscopy and scanning Auger microscopy 659
MnO(100)
Electron correlation in MnO(100): a comparison of SXAPS and CEELS spectra 547
Model
The ab-initio simulation of Auger spectra 47
Molecular metal cluster compound
On the binding-energy shifts in molecular metal cluster compounds 741
Photoemission from large-nuclearity copper-selenide clusters 207
Monoatomic layer
Design and preparation of an organic monoatomic layer 377
Monte Carlo calculation
The influence of elastic scattering in overlayers on PED from PbS single crystals 709
Monte Carlo model
Monte Carlo modelling of the backscattered electron spectra of silver at the 200 eV and 2 keV primary electron energies 427
Monte Carlo simulation
Photoelectron escape depth 443
MoS_2
Structure of ultrathin films of chloroaluminium phthalocyanine on MoS_2 studied by means of Penning ionization electron spectroscopy, angle-resolved UPS and LEED 259
Mössbauer spectroscopy
Properties of the Ni/Fe interface in Ni/Fe/Ni multilayers 665
Mott scattering
Spin polarized photoemission from thin GaAs photocathodes 505
Multilayers
Plasmon mode splitting in W/Si multilayers, detected by EELS 683

N_2
Theoretical autoionization spectra of $1s \rightarrow \pi^*$ excited N_2 and N_2O 295
N_2O
Theoretical autoionization spectra of $1s \rightarrow \pi^*$ excited N_2 and N_2O 295
Na
Electron impact excitation and ionization of laser-excited Na atoms 245
Ne $2p^4\ ^1S^e$
Parameterization of angular correlations in double photoionization to the neon $2p^4\ ^1S^e$ ionic state 229

Near threshold region
Resonance structure of the photoionization cross sections of the Kr atom in the energy region between single and double ionization thresholds 421
Ni(110)
Constant-energy surfaces of nickel near the Fermi energy: an angle-resolved ultraviolet photoemission study on Ni(110) 601
Ni(II)
Gas-phase valence photoelectron spectra of Ni(II) acetylacetonate with synchrotron radiation 277
NIR
Resonant interaction of low energy electrons with intramolecular vibrations in solid C_{60} 115
NO
Enhancement of circular dichroism in photoemission from adsorbates by photoelectron diffraction 97
Time resolved core level photoemission experiments with synchrotron radiation 145
NO/Cu(111)
Electronic excited states of NO/Cu(111) studied with two-photon photoemission 371
Noble gas
Investigation of alkali metals and noble gases adsorbed on transition metals using circular dichroism in angular resolved photoemission 289
Noise removal
Noise removal from Auger images by using adaptive bimonial filter 399
Non-chiral
Circular dichroism from non-chiral and non-magnetic materials observed with display-type spherical mirror analyzer 55
Non-magnetic
Circular dichroism from non-chiral and non-magnetic materials observed with display-type spherical mirror analyzer 55
Novel
Design of an electrostatic electron spectrometer for simultaneous energy and angular distribution measurements 433
Electron spectroscopy into the twenty-first century 1
Nuclearity
Photoemission from large-nuclearity copper-selenide clusters 207

O1s
Photoelectron escape depth 443
ODDOS
Structure factor in photoemission from valence band 487
ORS
Analysis of the XPS and optical reflectivity spectra of the chemically etched Si(111) surfaces 565
Oxide film
Photoemission study of thin and ultrathin oxide films on transition metals surfaces 577
Oxygen annealing
AES and USXES investigations of the phase transformation in the surface layers of V–Si/SiO_2/Si thin films structure stimulated by oxygen annealing 511

PbS
The influence of elastic scattering in overlayers on PED from PbS single crystals 709
PbS(001)
Inverse photoemission and photoemission spectra of the PbS(001) surface 729
Pd
CO adsorption on Pd: An XPS and density functional approach 383
Spectator vacancy contributions to the $L_{2,3}M_{4,5}M_{4,5}$ Auger spectra of Pd and Rh: satellites as images of the main spectrum 345
Pd(001)
Growth mechanism and epitaxy of ultra-thin cobalt films on Pd(001) 455
Pd(001)–C(2 × 2)Mn
Oxidation of carbon monoxide and ethylene on Pd(001)-C(2 × 2)Mn 201
PDMEE
Element-specific, surface and subsurface structural analysis by scattering-interference of primary electrons 723
PED
The influence of elastic scattering in overlayers on PED from PbS single crystals 709
PES
Avrami's kinetic approach for describing Volmer Weber growth mode at solid surfaces studied via PES and AES 283
Electron spectroscopy on $KMnO_4$ 671
Electron spectroscopy studies of small deposited metal particles 301
Gas-phase valence photoelectron spectra of Ni(II) acetylacetonate with synchrotron radiation 277
Inverse photoemission and photoemission spectra of the PbS(001) surface 729
Photoemission study of thin and ultrathin oxide films on transition metals surfaces 577
Thermal effects on photoemission spectra of lanthanide metals 571
X-ray emission and photoelectron spectroscopy study and the electronic structure of $Dy_{1-x}Tb_xFe_2$ (x = 0.0, 0.5, 1.0). 641
Phase transformation
AES and USXES investigations of the phase transformation in the surface layers of V–Si/SiO_2/Si

thin films structure stimulated by oxygen annealing 511
Photoelectron diffraction spectra
Direct methods for adsorbate structure determination using photoelectron diffraction 85
Photoelectron holography
Direct methods for adsorbate structure determination using photoelectron diffraction 85
Photoelectron holography: prospects and limitations of direct methods 351
Photoelectron spectrometer
Studies of reactive intermediates with photoelectron spectroscopy using synchrotron radiation: initial results on $SO(X^3\Sigma^-)$ 165
Photoemission structure factor
Structure factor in photoemission from valence band 487
Photoionization cross section
Many-electron correlations in the photoionization of the $np^5(n+1)s\ ^3P_0$ and $^3P_2$ metastable states of the Ar and Kr atoms 389
The energy influence of the electron excitation on the shape of X-ray electron spectra of 3d-metals valence bands 619
Photoionization of atomic ions
A dedicated electron spectrometer for photoionization studies of atomic ions with synchtrotron radiation 237
Phthalocyanine
Determination of two-dimensional structures of ultrathin films of H_2- and Cu-phthalocyonine on HoS_2 by angle-resolved ultraviolet photoemission and low energy diffraction 213
Metal phthalocyanines (MPc, M = Ni, Cu) on Cu(001) and Si(001) surfaces studied by XPS, XAS and STM 219
PIE
Inner-shell d excitation in gas phase heavy-metal halides by synchrotron radiation photoemission and ab initio CI calculations 171
PIES
Structure of ultrathin films of chloroaluminium phthalocyanine on MoS_2 studied by means of Penning ionization electron spectroscopy, angle-resolved UPS and LEED 259
PIFS
Resonance structure of the photoionization cross sections of the Kr atom in the energy region between single and double ionization thresholds 421
Plasmon mode splitting
Plasmon mode splitting in W/Si multilayers, detected by EELS 683
Point-charge potential approximation
Auger parameter and Wagner plot in the characterization of chemical states: initial and final state effects 365
Polarized X-rays
Angular distribution and spin polarization of Auger electrons following photoionization by polarized X-rays 157
Poly(*p*-phenylene)
Angle-resolved ultraviolet photoelectron spectroscopy of oriented film of model compound of poly(*p*-phenylene): wavenumber (*k*)-conservation and *k*-blurring in a system with small number of repeating units 553
Polypyrrole
New findings on polypyrrole chemical structure by XPS coupled to chemical derivatization labelling 629
Porphyrin/metal interface
The electronic structure and energy level alignment of porphyrin/metal interfaces studied by ultraviolet photoelectron spectroscopy 559
Pt(111) Synchrotron radiation
Time resolved core level photoemission experiments with synchrotron radiation 145
Pt(111)
Enhancement of circular dichroism in photoemission from adsorbates by photoelectron diffraction 97

Quasi-one-dimensional metal
Angle-resolved photoemission of quasi-one-dimensional metals: evidence for Luttinger liquid behavior 121

Radiative transition
Low-energy Auger spectra of Ar and Kr emitted in cascade decays after inner shell ionization 325
Rare earth
Sensitivity of the valence states upon rare earth substitution in intermetallic compounds 517
REELM
Elemental and chemical microanalysis of silicon surfaces by reflected electron energy loss microscopy and scanning Auger microscopy 659
Resonant 3d photoemission
Resonant 3d photoemission of La and Ce around the L_3 absorption edge in LaPd and CePd 735
ResPES
Electron spectroscopy on $KMnO_4$ 671
Rh
Spectator vacancy contributions to the $L_{2,3}M_{4,5}M_{4,5}$ auger spectra of Pd and Rh: satellites as images of the main spectrum 345
Roman artefact
Surface and interface microchemistry of archaeological objects studied with X-ray photoemission

spectroscopy and scanning Auger microscopy 653
Rutile
Theoretical study of optical and ultraviolet photoemission spectra of TiO_2 and VO_2 in rutile phase 753

SAM
Elemental and chemical microanalysis of silicon surfaces by reflected electron energy loss microscopy and scanning Auger microscopy 659
Noise removal from Auger images by using adaptive bimonial filter 399
Surface and interface microchemistry of archaeological objects studied with X-ray photoemission spectroscopy and scanning Auger microscopy 653
Satellite
Spectator vacancy contributions to the $L_{2,3}M_{4,5}M_{4,5}$ auger spectra of Pd and Rh: satellites as images of the main spectrum 345
Sb/Si(111)(2 × 3)
Electronic states on clean Si(110)16 × 2 and Si(110)2 × 3-Sb surfaces by photoemission and optical spectroscopy 481
Scattering interference of primary electrons
Element-specific, surface and subsurface structural analysis by scattering-interference of primary electrons 723
SCLS
Surface core level shifts in III–IV semiconductors: a high resolution photoemission study 139
SDR
Electronic states on clean Si(110)16 × 2 and Si(110)2 × 3-Sb surfaces by photoemission and optical spectroscopy 481
Electrons on CdTe(110) surface 647
Segregation
Interdiffusion and segregation in the growth of thin Fe films on Ag(100); an ARUPS-MDS study 471
Self-assembled alkanethiol
Surface molecular structure of self-assembled alkanethiols by UPS, synchrotron radiation and HREELS 523
Semiconductor
A new spectroscopic method for determination of energy distribution of interface states in the semiconductor band-gap 595
Effects of barrier height inhomogeneity on semiconductors core level photoemission line shape 477
Surface core level shifts in III–V semiconductors: a high resolution photoemission study 139
Shake satellite spectrum
Statistical description of shake satellites in Auger spectra. Oxygen and carbon Auger spectra of the CO molecule 329
Shirley's inversion formula
Quantitative analysis of the composition of silicon-germanium alloys by AES 703
Si(001)
Metal phthalocyanines (MPc, M = Ni, Cu) on Cu(001) and Si(001) surfaces studied by XPS, XAS and STM 219
Excimer laser cleaning of Si(100) surfaces at 193 and 248 nm studied by LEED, AES and XPS spectroscopies 607
Si(100)(2 × 1)
Surface electronic structure at Si(100)-(2 × 1) 541
Si(110)(16 × 2)
Electronic states on clean Si(110)16 × 2 and Si(110)2 × 3-Sb surfaces by photoemission and optical spectroscopy 481
High resolution synchrotron radiation Si 2p core-level spectroscopy of Si(110)16 × 2 613
Si(111)
Analysis of the XPS and optical reflectivity spectra of the chemically etched Si(111) surfaces 565
Si(111)7 × 7
Adsorption of ethylene on Si(111)7 × 7 by synchrotron radiation photoemission 271
Synchrotron radiation-induced Fe deposition on Si from organometallic precursors: comparison with Fe silicides obtained by solid-phase epitaxy 437
Silicon
Elemental and chemical microanalysis of silicon surfaces by reflected electron energy loss microscopy and scanning Auger microscopy 659
Silicon–germanium alloy
Quantitative analysis of the composition of silicons-germanium alloys by AES 703
Silver
Monte Carlo modelling of the backscattered electron spectra of silver at the 200 eV and 2 keV primary electron energies 427
SiO_2
XPS analysis on SiO_2 sol–gel thin films 623
SiO_2/Si
Total reflection X-ray photoelectron spectroscopy 313
Sn
Cr, Sn and Ag/SnO_2 interface formation studied by synchrotron radiation induced UPS 499
Sn4d
Inner-shell d excitation in gas phase heavy-metal halides by synchrotron radiation photoemission and *ab initio* CI calculations 171
SnO_2
Cr, Sn and Ag/SnO_2 interface formation studied by synchrotron radiation induced UPS 499
SO($X^3\Sigma^-$)
Studies of reactive intermediates with photoelectron

spectroscopy using synchrotron radiation: initial results on SO($X^3\Sigma^-$) 165
Sol–gel
XPS analysis on SiO_2 sol–gel thin films 623
Space charge layer
Space charge layer at metal/InSb(110) interfaces 459
Spectator vacancy
Spectator vacancy contributions to the $L_{2,3}M_{4,5}M_{4,5}$ auger spectra of Pd and Rh: satellites as images of the main spectrum 345
Spin polarization
Angular distribution and spin polarization of Auger electrons following photoionization by polarized X-rays 157
Angular distribution and spin-polarisation of Auger electrons 225
Spin polarized photoemission
Spin polarized photoemission from thin GaAs photocathodes 505
Spin resolved inverse photoemission
Spin resolved inverse photoemission of ferromagnets: Fe(100) 177
SPMDS
Surface magnetism of Fe on Ag(100): a He* spin polarized study 677
STM
Metal phthalocyanines (MPc, M = Ni, Cu) on Cu(001) and Si(001) surfaces studied by XPS, XAS and STM 219
Stoner-like behaviour
Temperature-dependent study of the partially filled surface state on Tb(0001) 535
Sulphur compound
Spectator auger transitions of the 1s hole states in ionic sulfur compounds and molecular chlorine compounds 411
Superconductor
Electronic and geometric structure of small mass selected clusters 37
Electronic structure and chemical bonding of superconductor $YBa_2Cu_3O_{7-x}$ 715
Surface
Surface electronic structure at Si(100)-(2 × 1) 541
Surface magnetism
Surface magnetism of Fe on Ag(100): a *He** spin polarized study 677
Surface magnetrometry
LMDAD as a surface magnetometry 189
Surfactant
Structures at liquid surfaces studied by core electron spectroscopy 417
SXAPS
Electron correlation in MnO(100): a comparison of SXAPS and CEELS spectra 547
Symmetry breaking in the surface field
Electronically induced dynamics in surface layers 73
Synchrotron radiation
A dedicated electron spectrometer for photoionization studies of atomic ions with synchtrotron radiation 237
Combined electron and ion spectroscopy with synchrotron radiation of free metal atoms and ions 21
Gas-phase valence photoelectron spectra of Ni(II) acetylacetonate with synchrotron radiation 277
High resolution synchrotron radiation Si 2p core-level spectroscopy of Si(110)16 × 2 613
Cr, Sn and Ag/SnO_2 interface formation studied by synchrotron radiation induced UPS 499
Studies of reactive intermediates with photoelectron spectroscopy using synchrotron radiation: initial results on SO($X^3\Sigma^-$) 165
Surface molecular structure of self-assembled alkanethiols by UPS, Synchrotron Radiation and HREELS 523
Adsorption of ethylene on Si(111)7 × 7 by synchrotron radiation photoemission 271
Synchrotron radiation photoemission
Inner-shell d excitation in gas phase heavy-metal halides by synchrotron radiation photoemission and *ab initio* CI calculations 171
Tb(0001)
Temperature-dependent study of the partially filled surface state on Tb(0001) 535
Thermal effect
Thermal effects on photoemission spectra of lanthanide metals 571
Thermal stability
Photoemission study of thin and ultrathin oxide films on transition metals surfaces 577
Thin film
AES and USXES investigations of the phase transformation in the surface layers of V–Si/SiO_2/Si thin films structure stimulated by oxygen annealing 511
Interdiffusion and segregation in the growth of thin Fe films on Ag(100); an ARUPS MDS study 471
Photoemission study of thin and ultrathin oxide films on transition metals surfaces 577
XPS analysis on SiO_2 sol–gel thin films 623
TiO_2
Theoretical study of optical and ultraviolet photoemission spectra of TiO_2 and VO_2 in rutile phase 753
TIY spectrum
Inner-shell d excitation in gas phase heavy-metal halides by synchrotron radiation photoemission and *ab initio* CI calculations 171

Total reflection
Total reflection X-ray photoelectron spectroscopy 313
TPEsCO
Observation of doubly charged atomic and molecular states by threshold photoelectron coincidence spectroscopy 253
Transition metal
Investigation of alkali metals and noble gases adsorbed on transition metals using circular dichroism in angular resolved photoemission 289
Transition metal compound
The energy influence of the electron excitation on the shape of X-ray electron spectra of 3d-metals valence bands 619
TRXPS
Time resolved core level photoemission experiments with synchrotron radiation 145
Tungsten
The multi-surface structure and catalytic properties of partially reduced WO_3, WO_2 and $WC + O_2$ or $W + O_2$ as characterized by XPS 195
Tungsten carbide
The multi-surface structure and catalytic properties of partially reduced WO_3, WO_2 and $WC + O_2$ or $W + O_2$ as characterized by XPS 195
Tungsten oxide
The multi-surface structure and catalytic properties of partially reduced WO_3, WO_2 and $WC + O_2$ or $W + O_2$ as characterized by XPS 195
Two-photon photoemission
Electronic excited states of NO/Cu(111) studied with two-photon photoemission 371

Ultrathin film
Determination of two-dimensional structures of ultrathin films of H_2- and Cu- phthalocyanine on MoS_2 by angle-resolved ultraviolet photoemission and low energy electron diffraction 213
Growth mechanism and epitaxy of ultra-thin cobalt films on Pd(001) 455
Photoemission study of thin and ultrathin oxide films on transition metals surfaces 577
Structure of ultrathin films of chloroaluminium phthalocyanine on MoS_2 studied by means of Penning ionization electron spectroscopy, angle-resolved UPS and LEED 259
UPS
Constant-energy surfaces of nickel near the Fermi energy: an angle-resolved ultraviolet photoemission study on Ni(110) 601
Electrons on CdTe(110) surface 647
Cr, Sn and Ag/SnO_2 interface formation studied by synchrotron radiation induced UPS 499
Structure of ultrathin films of chloroaluminium phthalocyanine on MoS_2 studied by means of Penning ionization electron spectroscopy, angle-resolved UPS and LEED 259
Surface molecular structure of self-assembled alkanethiols by UPS, Synchrotron Radiation and HREELS 523
The electronic structure and energy level alignment of porphyrin/metal interfaces studied by ultraviolet photoelectron spectroscopy 559
Theoretical study of optical and ultraviolet photoemission spectra of TiO_2 and VO_2 in rutile phase 753

V–Si/SiO_2/Si
AES and USXES investigations of the phase transformation in the surface layers of V–Si/SiO_2/Si thin films structure stimulated by oxygen annealing 511
Valence configuration
The dependence of the atomic core potential on valence charge for Cu 333
Valence double photoionization
Investigation of double photoionisation dynamics in molecules using coincidence techniques 63
Valence state
Sensitivity of the valence states upon rare earth substitution in intermetallic compounds 517
VO_2
Theoretical study of optical and ultraviolet photoemission spectra of TiO_2 and VO_2 in rutile phase 753
Volmer Weber growth mode
Avrami's kinetic approach for describing Volmer Weber growth mode at solid surfaces studied via PES and AES 283

W/Si
Plasmon mode splitting in W/Si multilayers, detected by EELS 683
Wagner plot
Auger parameter and Wagner plot in the characterization of chemical states: initial and final state effects 365
White beam synchrotron radiation
Synchrotron radiation-induced Fe deposition on Si from organometallic precursors: comparison with Fe silicides obtained by solid-phase epitaxy 437

X-ray microscope
X-ray photo-electron spectromicroscopy 9
XAES
The effect of final state screening changes on alloy energy shifts 319
XAS
Metal phthalocyanines (MPc, M = Ni, Cu) on Cu(001) and Si(001) surfaces studied by XPS, XAS and STM 219

Xe on graphite
Angle-resolved metastable atom electron spectra of Xe layers formed on graphite 359
Xe
Manifestation of FISCI effects in the total and differential cross sections of the correlation satellites in the rare gases Kr and Xe 337
XPS
Growth mechanism and epitaxy of ultra-thin cobalt films on Pd(001) 455
A new spectroscopic method for determination of energy distribution of interface states in the semiconductor band-gap 595
Analysis of the XPS and optical reflectivity spectra of the chemically etched Si(111) surfaces 565
Chloride formation and photoreduction on the Cu(100) surface. A study by X-ray photoelectron spectroscopy and low energy ion scattering 91
CO adsorption on Pd: An XPS and density functional approach 383
Excimer laser cleaning of Si(100) surfaces at 193 and 248 nm studied by LEED, AES and XPS spectroscopies 607
Metal phthalocyanines (MPc, M = Ni, Cu) on Cu(001) and Si(001) surfaces studied by XPS, XAS and STM 219
New findings on polypyrrole chemical structure by XPS coupled to chemical derivatization labelling 629
Photoelectron escape depth 443
Photoemission from large-nuclearity copper-selenide clusters 207
Surface and interface microchemistry of archaeological objects studied with X-ray photoemission spectroscopy and scanning Auger microscopy 653
Surface structure of finely dispersed activated iron with immbolized interferon as derived from XPS 689
Surface structure of finely dispersed iron stabilized by spontaneous adsorption as derived from XPS and ESR evidence 695
The effect of final state screening changes on alloy energy shifts 319
The energy influence of the electron excitation on the shape of X-ray electron spectra of 3d-metals valence bands 619
The multi-surface structure and catalytic properties of partially reduced WO_3, WO_2 and $WC + O_2$ or $W + O_2$ as characterized by XPS 195
Total reflection X-ray photoelectron spectroscopy 313
X-ray emission and photoelectron spectroscopy study and the electronic structure of $Dy_{1-x}Tb_xFe_2$ (x = 0.0, 0.5, 1.0). 641
XPS analysis on SiO_2 sol–gel thin films 623
XPS studies of amorphous alloys 719

Yb/GaAs(110)
A MDS study of the Yb/GaAs(110) interface 133
$YBa_2Cu_3O_{7-x}$
Electronic structure and chemical bonding of superconductor $YBa_2Cu_3O_{7-x}$ 715
